# Hi-Traction® Covers for SCHOOL BUSES

Protect Children and Drivers

## SAFEGUARD® Hi-Traction® Anti-Slip Covers

The high coefficient of friction solution to slips-and-falls

Worn rubber treads present dangerous, slippery conditions especially when sharp metal is exposed. Introducing water, oil, and food further accentuates the hazard. Safeguard® Hi-Traction® Anti-Slip Step Covers are designed as a retrofit solution that are quickly fastened directly over worn and dangerous bus steps.

### School Bus Applications

#### Steps:

There are two options when addressing slippery school bus steps with Safeguard® Hi-Traction™ Covers:

#### 1) 3" Safeguard Hi-Traction® Step Covers

When the rubber on the leading edge is worn, cracked or missing but the tread is in good condition, the white portion can be removed and replaced with a 3" deep Safeguard® Step Cover.

#### 2) Full Tread Step Covers

When the entire rubber step is worn and slippery or in need of a "facelift", Safeguard® Two-Tone Step Covers are the solution. In keeping with School Bus Standards, the first 3" of the Step Cover is white, but the remaining depth of the tread (up to 15") can be configured in a contrasting darker color such as Black or Blue.

#### Wheelchair Ramps & Lifts:

Safeguard Vinyl (Flexible PVC) with Pressure Sensitive Adhesive is the ideal solution for eliminating slippery conditions on wheelchair ramps and lifts. The high quality adhesive laminate provides an easy, one-step "Peel-and-Stick" installation that will provide Anti-Slip protection for years of service.

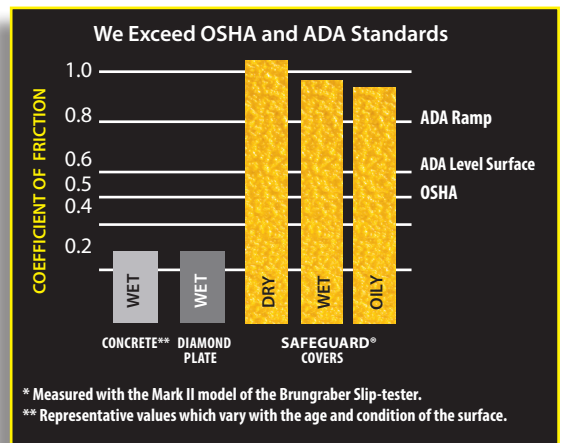

#### Coefficient of Friction

Safeguard Technology's unique surface nearly doubles both the OSHA's 0.5 and the ADA's 0.6 guidelines for Coefficient of Friction values as confirmed in independent lab testing using the Mark II Model of the Brungraber slip tester. Even in wet or oily conditions, we greatly exceed these guidelines.

#### Color Standards

White is the standard for the leading step edges on School Buses. When covering more than the initial 3" area, combining white with a contrasting color creates an attractive solution that hides the dirt and wear from foot traffic. Safeguard HiGlo-Traction® offers the standard white during the day with the benefit of photoluminescent "Glow-in-the-Dark" when dark. Once charged by natural or

fluorescent light, these Covers emit a visible glow for many hours making early morning and evening boarding & exiting that much safer.

#### Easy Installation & Cleaning

Installation is easily achieved using mechanical fasteners, adhesive or a combination of the two. Vinyl Walkway Covers are available with PSA (pressure sensitive adhesive). Cleanup is a snap with a non-solvent cleaner and stiff bristle brush.

Please refer to our installation and cleaning guide for complete instructions.
